

Neuro-SysMed

Junior Scientist Symposium

November 29, 2024, 09.00-13.00

in Auditorium 4, BB-building

Explore new frontiers with the young Neuro-SysMed researchers!
Learn about current research within MS, Parkinson's disease, dementia and ALS. Senior researchers are also welcome. Lunch is included.

- *How to make it in science* by **Yamila Torres Cleuren**, Neuro-SysMed senior scientific advisor
- **Max Korbmacher**: PROMising: Patient Recorded Outcome Measures predict multiple sclerosis trajectories better than brain, blood and genotyping
- **Julia Saltyte Benth**: Parkinson's disease in women and men. Sex differences in cognitive symptoms, mild cognitive impairment, and dementia
- **Jonas Bull Haugsøen**: Immune Reconstitution after Hematopoietic Stem Cell Transplantation in MS
- **Kjell Inge Erikstad**: Improving Diagnostics in Paraneoplastic Neurological Syndromes: Optimization of a Cell-Based Assay for SOX1 Antibody Detection
